DECISION

«Regulation on Management and Assignment of [.gr] Domain Names»

The Hellenic Telecommunications and Post Commission (EETT)»

Having regard to:
a. Law N.4070/2012 "Regulation of Electronic Communications, Transport, Public Works and other provisions" (Gov. Gaz. Issue 82/A/10-4-2012) and in particular items (xxiv) and (xxxxi) of Article 12 thereof;
b.   EETT Decision No 592/012/3-2-2011 «Regulation on Management and Assignment of [.gr] Domain Names» (Gov. Gaz. Issue 593/B/14-4-2011)
c.   the Public Consultation on Amendment and Codification of provisions of the Regulation on Management and Assignment of [.gr] Domain Names, held by EETT from 15-1-13 to 18-2-13, as well as the results of the consultation;
d. the fact that the provisions of the present Decision create no cost for the State Budget or EETT's Budget;
.

Has decided
To issue a New Regulation on Management and Assignment of [.gr] Domain Names, as follows:

CHAPTER I
OBJECTIVE – DEFINITIONS

Article 1
Objective – Scope of Application
1. The objective of the present Decision is to establish rules regarding:
    a. the procedure for the assignment and the use of [.gr] Domain Names, and
    b. the operation of the Registrars.
2. The following Domain Names shall be subject to assignment:
    a. 2nd level [.gr] Domain Names, and
    b. 3rd level [.gr] Domain Names in which only the third level is a Variable Field.
3. EETT shall be the only competent authority for the assignment of:
    a. 2nd level [.gr] Domain Names, and
    b. 3rd level [.gr] Domain Names in which only the third level is a Variable Field.

4. With the exception of 3rd level [.gr] Domain Names in which only the third level is a Variable Field, all other 3rd or higher level [.gr] Domain Names shall not be subject to assignment by EETT and no exclusive rights to them shall be acquirable in accordance with the present Decision.

5. The use of any 3rd or higher level Domain Name shall require the prior assignment in accordance with the present Decision of the corresponding 2nd level [.gr] Domain Name that makes up the 3rd or higher level Domain Name, or the prior assignment of the corresponding 3rd level [.gr] Domain Name in which only the third level is a Variable Field.

6. Subject to the terms and conditions of the present Regulation, a 3rd or higher level Domain Name made up by a [.gr] Domain Name that in accordance with the present Regulation is subject to assignment by EETT, may be used either by the Holder of the assigned [.gr] Domain Name or by any other natural or legal person having the consent of the Holder of the corresponding assigned [.gr] Domain Name.

Article 2
Definitions

For the implementation of the present Decision, the following terms shall have the meanings ascribed to them, respectively, as follows:

Authoritative Domain Name Server: A Domain Name Server is an Authoritative Domain Name Server with respect to specific subsets of the tree structure of the Domain Names when it undertakes to keep all valid information that determines the specific subsets. Such information is organised in units called 'zones', which may be automatically distributed to Domain Name Servers that provide back up services for the information of each zone.

Denial of Service (DoS) ή Distributed Denial of Service (DDoS): is an attempt to make a machine or network resource unavailable to its intended users.

Zone File: A file that is hosted in a Domain Name Server and determines precisely, among other things, Domain Names along with the corresponding subdomains, the corresponding IP Addresses and the corresponding name assignment servers.

Reserved [.gr] Domain Name: A Domain Name that is reserved according to paragraphs 7 and 8 of Article 3 hereof for a specific Holder and can be activated following the submission of an activation declaration by the Holder, submitted to the Registry through the Registrar.

(Code Injection): is the exploitation of a computer bug that is caused by processing invalid data. Code injection can be used by an attacker to introduce (or "inject") code into a computer program to change the course of execution.

Assignment of a [.gr] Domain Name: The act of registering in the Register a relevant declaration that reserves for a specific natural or legal person, and grants to that person an exclusive right to use, a specific 2nd level

[.gr] Domain Name or 3rd level [.gr] Domain Name in which only the third level is a Variable Field, under the terms of the present Decision.

Activation of a Domain Name: The start of operations of a Domain Name as a means of communication on the Internet through its registration in the corresponding Domain Name Servers.

Activation of a [.gr] Domain Name: The start of operations of a [.gr] Domain Name previously assigned in accordance with the present Decision. The Register includes registrations regarding the corresponding [.gr] Domain Name Servers in the zone files it keeps. The Domain Name Servers declared for the [.gr] Domain Name shall reply to name assignment declarations according to the provisions of the Internet Domain Name System and of Annex I attached hereto.

Domain Name Server: An IT system connected to the Internet and having as main functions to keep information regarding the tree structure of the Domain Names and to match Domain Names with IP Addresses according to the Internet Domain Name System. A Domain Name Server may keep temporary copies of data regarding any section of the tree structure of the Domain Names, but usually a Domain Name Server keeps complete and valid information on a subset of the Domain Names, as well as references (pointers) to other Domain Name Servers that can guide to valid information on the other sections of the tree structure of the Domain Names.

DNSSEC: DNS Security Extensions: The system that provides security to the Domain Name System. The Registry imports DS records for the domain names of. Gr wishing to use this technology. These entries are entered to the Registry by the Registrar upon request from the registrant or operator of the Domain Name .Gr. Changing the Domain Name Server that uses DNSSEC may require prior consultation between old and new Registrar and / or temporary removal of DNSSEC records from the Registry in order to make the change without interrupting the operation of the Domain Name.

IP Address: A sequence of 32 or 128 binary digits that is used for address assignment operations based on the Internet Protocol (IP).

Registration: The entire procedure followed for the assignment of [.gr] Domain Names that starts with the submission of a relevant registration declaration to a Registrar and ends with the assignment of a [.gr] Domain Name by EETT.

Registrar: A natural or legal person that can receive registration declarations from parties interested in the assignment of a [.gr] Domain Name, as well as any declarations with respect to [.gr] Domain Names regarding transfer, change of the Holder's corporate name / name, activation of a reserved Domain Name, deletion, renewal, change in the data, and/or change of Registrar. The Registrar must constantly meet the minimum requirements set forth in Annex II attached hereto, as applicable each time. Any natural or legal person meeting the minimum requirements of Annex II may act as a Registrar in accordance with the present Decision and in particular with Article 16 hereof.

<u>Registrant</u>: A natural or legal person that submits through a Registrar a registration declaration for the assignment of a [.gr] Domain Name.

<u>[.gr] Domain Name Authorisation Code</u>: A combination of alphanumeric characters that ensures the identification of the Domain Name Holder by the Register and allows the Holder to manage the specific Domain Name.

<u>ISO 3166-1</u>:It is part of the ISO 3166, and defines codes for the names of countries and dependent territories,

<u>Resolvers</u>: Programmes that extract information from Domain Name Servers, responding to client software requests. They must be able to access at least one Domain Name Server, as well as to use the information kept by the Domain Name Server so as to reply to a query either directly or indirectly following the references (pointers) to other Domain Name Servers.

<u>Variable Field</u>: The Variable Field of a Domain Name is that part of the Domain Name that is not exclusively made up of:
i.   the alphanumeric element [.gr], and/or
ii.   the alphanumeric elements that make up a Common Use [.gr] Domain Name.

<u>Register</u>: The database that includes all assigned [.gr] Domain Names and any [.gr] Domain Names for which registration declarations have been submitted, along with each one's corresponding data, as these are determined from time to time by an EETT Decision. In addition, the <u>Registry</u> (i.e. the legal person managing the Register) is responsible for the management of the Domain Name Servers and the zone files that are necessary for the proper function of the [.gr] Domain Names. The Register belongs to EETT, which is responsible for using it properly and in accordance with the legislation in force. EETT may manage the Register on its own or assign its management to any other legal person under the terms hereof.

<u>Homograph [.gr] Domain Names</u>: Domain Names in which the Non-variable Field is identical and the Variable Field consists of alphanumeric characters that visually match – in their lower case, upper case, punctuated or unpunctuated form – according to the Greek and Latin character correspondence table included in Annex XVI attached hereto.

<u>Domain Name</u>: An alphanumeric element assigned for use to a natural or legal person so that Internet protocols or services can be used by the specific person or with its consent. Particularly in the case of Domain Names with Greek characters, the assigned Domain Name may not be matching its form in Latin characters as used in the zone files, due to the technical representation required by the DNS.

<u>1st or top level [.gr] Domain Name</u>: The [.gr] Domain Name.

<u>2nd level [.gr] Domain Name</u>: Any Domain Name having the form [name.gr]. The field "name" constitutes the second level of the 2nd level [.gr] Domain Name.

<u>3rd level [.gr] Domain Name</u>: Any Domain Name having the form [name2.name1.gr]. The fields "name2" and "name1" respectively

constitute the third and the second level of the 3rd level [.gr] Domain Name.

[.gr] Domain Name: For the purposes of the present Regulation, any [.gr] Domain Name that may be subject to assignment by EETT, i.e. all 2nd level [.gr] Domain Names and all 3rd level [.gr] Domain Names in which only the third level is a Variable Field.

Internet Domain Name System (DNS): All software and hardware elements, along with their network connections, that serve the Domain Name management principles established by the Internet standards RFC 1034, RFC 1035, RFC 1122, RFC 1123 and RFC 2182, as well as by all other standards subsequently amending, supplementing and/or based on these.

Holder of a [.gr] Domain Name: The natural or legal person to which a [.gr] Domain Name has been assigned.

Code Injection: The exploitation of a programming error in a software application caused by the processing of invalid data. The technique used consists in injecting and running alien code into an application in order to change its regular command execution course.

Denial of Service (DoS) or Distributed Denial of Service (DDoS): The technique by which a computer's services and resources become unavailable to the intended users.

Domain Name System Security Extensions (DNSSEC): The system that adds security to the Domain Name System (DNS). The Register incorporates entries of DS records for the [.gr] Domain Names of Holders that wish to use this technology. These entries are registered in the Register by the Registrar following a relevant request by the Registrant or the Holder of the [.gr] Domain Name. Changing the Domain Name Server of a Domain Name that uses DNSSEC may require prior arrangements and coordination between the former and the new Registrar and/or temporary removal of the DNSSEC entries from the Register for the change to be carried out without interrupting the operation of the Domain Name.

CHAPTER II
SCOPE OF THE RIGHT – USE OF [.gr] DOMAIN NAMES – COMMON USE [.gr] DOMAIN NAMES

Article 3
Makeup of the [.gr] Domain Names

1. All [.gr] Domain Names shall consist either:
   a. of Latin alphabet alphanumeric characters [i.e. A-Z, a-z, 0-9] plus the special characters [-] and [.] as regards both their Variable and Non-variable Fields, where the special character [.] shall be used only for level separation purposes and each level of the [.gr] Domain Names shall neither start nor end with the character [-] and shall not include successive [-] characters; or

b. of Greek alphabet alphanumeric characters [i.e. Α-Ω, α-ω, 0-9] codified in PUNYCODE format as regards their Variable Field and of Latin alphabet alphanumeric characters [i.e. A-Z, a-z, 0-9] as regards their Non-variable Field, plus the special characters [-] and [.], where the special character [.] shall be used only for level separation purposes and each level of the [.gr] Domain Names shall neither start nor end with the character [-] and shall not include successive [-] characters.

2. No distinction shall be made between the Greek alphanumeric characters [ς] and [σ]. Wherever it appears, the character [ς] shall be automatically replaced by the character [σ].

3. Any [.gr] Domain Names that use both Latin and Greek alphabet alphanumeric characters within the same level shall not be supported.

4. A [.gr] Domain Name shall include in its Variable Field at least three (3) characters, and along with its Non-variable Field it shall include up to sixty-three (63) characters excluding the [.gr] end characters and the end characters of any Common Use 2nd level [.gr] Domain Names. The [.gr] end characters shall not be taken into account in the above counting. In the case of [.gr] Domain Names that consist of Greek alphabet alphanumeric characters, the number of sixty (60) characters shall pertain to the length of the PUNYCODE format of the Domain Name, which however may not necessarily be matching the number of characters of the Domain Name in its Greek form.

5. With respect to all [.gr] Domain Names, no distinction shall be made between lower case or upper case Latin characters, lower case or upper case unpunctuated Greek characters, and lower case or upper case punctuated Greek characters.

6. All [.gr] Domain Names shall be assigned in the lower case form declared by the Registrant in its registration declaration. The [.gr] Domain Names in which the Variable Field consists of Greek characters and the Non-variable Field consists of Latin characters shall be assigned in the lower case form declared by the user in its registration declaration (i.e. with any marks of accentuation, dieresis, punctuation, etc.), as well as in the lower case unpunctuated form of the name. The above two forms shall be registered in the Register in their corresponding PUNYCODE formats. The lower case unpunctuated form shall be declared in the zone file of the Register as the main form of the name, and all actions of the Registry in accordance with the present Regulation shall be carried out based on this lower case unpunctuated form.

7. Other forms of the same [.gr] Domain Name, i.e. [.gr] Domain Names resulting from a combination of the lower case unpunctuated form with punctuation marks placed at points other than those of the lower case form declared by the Registrant, shall be automatically reserved for the Registrant but shall only be activated following the Holder's submission of an activation declaration to the Registry.

8. Any [.gr] Domain Names that are homographs of a [.gr] Domain Name already assigned shall be automatically reserved for the Holder of the above assigned [.gr] Domain Name and shall be activated following the Holder's submission of an activation declaration to the Registry. In case that a recerved homograph domain name is country code included in the ISO 3166-1 list the organization ISO, (ISO 3166-1 alpha-3), then, it is not possible to activate the reserved domain name..

9. The Holder of a [.gr] Domain Name shall be required not to activate reserved [.gr] Domain Name forms that could not be subject to assignment on their own.

10. Any form of a reserved [.gr] Domain Name that is activated shall thereupon become an active Domain Name and all the provisions hereof shall be applicable to it.

11. EETT may determine by a subsequent Decision the use of alphanumeric characters of any other form or alphabet in the Variable or Non-variable Fields. The provisions of the present Regulation and of all individual EETT Decisions shall be applicable to such end characters and/or alphabets as well.

12. Upon implementation of the IDNA2008 protocol by the Registry's system, the Greek alphanumeric characters allowed for registration shall be limited to the characters [α-ω, 0-9], with the two characters [ς] and [σ] constituting different characters that shall create two different [.gr] Domain Names. The implementation of the IDNA2008 protocol, as well as the rules for the assignment of Domain Names with Greek characters and of their homographs based on the IDNA2008 protocol, shall be determined by a new EETT Decision.

<u>Article 4</u>
Scope of the right to [.gr] Domain Names

1. The right acquired upon assignment of a [.gr] Domain Name shall consist exclusively in the following:

    a. the acquisition by the [.gr] Domain Name Holder of an exclusive right to reserve and use the specific alphanumeric elements it has declared in its registration declaration – where in the case of a Domain Name in which the Variable Field consists of Greek characters the above exclusive right of reservation and use shall also include the lower case unpunctuated form of the Domain Name declared in the registration declaration – with the exclusive purpose of enabling the use of Internet protocols or services by the Holder or with its consent;

    b. the automatic reservation of the forms specified in paragraphs 7 and 8 of Article 3 hereof for the Holder of the specific Domain Name, and the right of the Holder to definitively activate – by submitting an activation declaration (according to Annex XVII attached hereto) within the duration of the exclusive right of use – any form of the Domain Name assigned to it that has been automatically reserved for it;

     c.   the acquisition by the Holder of an exclusive right to submit a renewal declaration for the specific Domain Name, as well as for its reserved forms, within fifteen (15) days from the expiry date of the Holder's exclusive right to use the Domain Name. After expiry of these fifteen (15) days, the Domain Name shall be made available for registration to any interested person. No renewal declaration can be submitted for a reserved form or an activated reserved form without renewal of the main form of a Domain Name.

2.   Without prejudice to the existence of any other right to the element that consists exclusively of the alphanumeric characters that make up the Variable Field of a:

     a.   2nd level [.gr] Domain Name, the Holder of the specific 2nd level [.gr] Domain Name shall not be entitled to prevent the assignment of a 3rd level [.gr] Domain Name in which only the third level is a Variable Field that consists of the same alphanumeric characters.

     b.   3rd level [.gr] Domain Name in which only the third level is a Variable Field, the Holder of the specific 3rd level [.gr] Domain Name in which only the third level is a Variable Field shall not be entitled to prevent the assignment of a 2nd level [.gr] Domain Name in which the Variable Field consists of the same alphanumeric characters.

     c.   3rd level [.gr] Domain Name in which only the third level is a Variable Field, the Holder of the specific 3rd level [.gr] Domain Name in which only the third level is a Variable Field shall not be entitled to prevent the assignment of a 3rd level [.gr] Domain Name in which only the third level is a Variable Field that consists of the same alphanumeric characters, as long as the second level of the second 3rd level [.gr] Domain Name in which only the third level is a Variable Field is made up by any Common Use [.gr] Domain Name.

3.   The Holder of a [.gr] Domain Name shall be entitled to forbid any third party:

     a.   to use, without the Holder's consent, exclusive alphanumeric elements identical to those making up the Variable Field of the [.gr] Domain Name of the Holder, in the makeup of the Variable Field of another [.gr] Domain Name of the same level in which the Non-variable Field is the same as the Non-variable Field of the Domain Name of the Holder.

     b.   to use, without the Holder's consent, exclusive alphanumeric elements identical to those making up the Variable Field of any [.gr] Domain Names reserved for the Holder, in the makeup of the Variable Field of another [.gr] Domain Name of the same level in which the Non-variable Field is the same as the Non-variable Field of the Domain Name of the Holder.

4.   Each [.gr] Domain Name shall be assigned in the form in which it is declared – as well as in its lower case unpunctuated form if it is a Domain

Name in which the Variable Field consists of Greek alphabet alphanumeric characters – and shall be protected in the form in which it is declared as well as in all its reserved forms.

5. The assignment of a 2nd level [.gr] Domain Name shall not constitute as well the assignment of a 3rd level [.gr] Domain Name in which only the third level is a Variable Field that is identical to the Variable Field of the assigned Domain Name. Accordingly, the assignment of a 3rd level [.gr] Domain Name in which only the third level is a Variable Field shall not constitute as well the assignment of a 2nd level [.gr] Domain Name that has an identical Variable Field, or the assignment of a 3rd level [.gr] Domain Name in which only the third level is a Variable Field that is identical to the Variable Field of the assigned Domain Name while the second levels of these two Domain Names are different.

6. The registration of a declaration in the Register for the assignment of a [.gr] Domain Name, whereby a natural or legal person acquires the exclusive right to reserve and use a specific 2nd level [.gr] Domain Name or 3rd level [.gr] Domain Name in which only the third level is a Variable Field, shall be governed by the principle of time priority. The right to a [.gr] Domain Name shall be acquired upon assignment thereof in accordance with the present Decision, but shall date back to the time of submission of the registration declaration to the EETT Registry.

7. All [.gr] Domain Names can be assigned to any Greek or foreign natural or legal person, regardless of whether established in Greece or not.

8. No restriction shall exist as to the number of [.gr] Domain Names that can be assigned to one single person.

9. The Holder of a right to a [.gr] Domain Name shall not acquire as well, as a result of the assignment of that [.gr] Domain Name in accordance with the present Decision, any trademark right to any undertaking, or product and/or service it offers, such rights being acquired exclusively according to the applicable provisions that govern their acquisition.

10. The provisions of the present Decision shall in no way restrict any trademark rights to any undertakings (of natural or legal persons), or products and/or services, or any copyrights.

Article 5
Use of 3rd or higher level Domain Names without assignment

1. No assignment procedure shall be required for 3rd or higher level [.gr] Domain Names made up by 2nd level [.gr] Domain Names or 3rd level [.gr] Domain Names in which only the third level is a Variable Field.

2. The Domain Name Holder shall be entitled to allow or forbid any third parties to use in common with the Holder the [.gr] Domain Name assigned to it.

3. In addition, the Holder of a [.gr] Domain Name:
   a. shall be exclusively responsible for the activation, with its consent or tolerance, of a 3rd level Domain Name in which the second level

is Variable or of a higher level Domain Name that includes the [.gr] Domain Name assigned to it;

b. shall be required to ensure that it shall forbid the activation of a 3rd level Domain Name in which the second level is Variable or of a higher level Domain Name that includes the [.gr] Domain Name assigned to it, or that it shall deactivate any such Domain Name in case there are grounds for the rejection of the registration declaration or the deletion of the assigned Domain Name, respectively, in accordance with the present Decision; and

c. shall be required to have the corresponding infrastructure necessary for the achievement of the above.

4. In case of transfer of the assigned [.gr] Domain Name, the new Holder shall acquire the rights held by the previous Holder prior to the transfer, according to the provisions of the present Article.

5. Any right granted by the Holder to a third party shall not constitute an assignment in accordance with the present Regulation.

6. Deletion of the [.gr] Domain Name of the Holder shall entail the discontinuation of all Domain Names that operate based on the specific [.gr] Domain Name according to the present Article.

7. The Holder shall be required to inform any interested party in writing with respect to the rights it acquires in accordance with the present Decision.

Article 6
Common Use 2nd Level [.gr] Domain Names

1. EETT shall be entitled to determine by a relevant Decision the Common Use 2nd level [.gr] Domain Names to which no person may acquire any exclusive right, and which can be used, subject to the provisions hereof, for the assignment of 3rd level [.gr] Domain Names in which only the third level is a Variable Field to any interested party. The employment of these Common Use 2nd level [.gr] Domain Names aims at facilitating search on the Internet, through the establishment and categorisation of elements identifying the capacity and/or status of a specific [.gr] Domain Name Holder.

2. All Common Use 2nd level [.gr] Domain Names shall be determined by EETT and included in Annex III attached hereto.

3. As an exception to subparagraph (b) of paragraph 2 of Article 4 hereof, the assignment of a 3rd level [.gr] Domain Name in which only the third level is a Variable Field and the second level consists exclusively of the alphanumeric characters that make up the element [.gov] shall rule out the use of this Variable Field by any other person.

4. EETT shall be entitled to amend Annex III from time to time, after holding a relevant public consultation.

CHAPTER III

VOID DECLARATIONS – GROUNDS FOR REJECTION – GROUNDS FOR DELETION

Article 7
Void registration declarations

1. In the following limitedly specified cases, a registration declaration shall be considered void and shall produce any legal consequence whatsoever:

   i. If the registration declaration is not complete, i.e. if its mandatory fields according to Annex V attached hereto have not been properly filled in.

   ii. If the Variable and/or the Non-variable Field of the [.gr] Domain Name runs contrary to the provisions of paragraphs 1, 2, 3, 4 and/or 5 of Article 3 hereof.

   iii. If at the time of submission of the registration declaration a [.gr] Domain Name identical to the one for which the registration declaration is submitted has already been assigned to any other person. Also, when multiple declarations are submitted for the same [.gr] Domain Name not yet assigned, or for homographs thereof, these declarations shall be placed in time priority order and examined in the light of paragraph 6 of Article 4 hereof. In case one registration declaration leads to assignment, all other declarations shall be immediately rejected as void. In case some registration declarations are either withdrawn or rejected as void, the next ones in time priority order shall be examined, without them being temporarily activated.

   iv. If at the time of submission of the registration declaration a [.gr] Domain Name identical to the one for which the registration declaration is submitted has already been reserved in the sense of the present Decision for any other person.

   v. If the Variable Field of the 2nd level [.gr] Domain Name for which the registration declaration is submitted constitutes a Common Use [.gr] Domain Name according to Annex III attached hereto.

   vi. If the Variable Field of the specific [.gr] Domain Name is identical to the Variable Field of an already assigned [.gr] Domain Name in which the second level consists of the alphanumeric characters [.gov].

   vii. If the Variable Field of a requested 2nd level [.gr] Domain Name is the same as a geographical term included in the list of geographical terms published on the EETT website in its Greek and Latin form (according to Annex XIV attached hereto) and the data included in the registration declaration do not identify the Holder requesting it as the corresponding Local Government Organisation entitled to it. This restriction shall not be applicable to the Variable Field of a requested 3rd level [.gr] Domain Name.

   viii. If the Variable Field of a 2nd level [.gr] Domain Name constitutes a country code included in the ISO 3166-1 list of the International

Organisation for Standardisation (ISO 3166-1, alpha-3). Domain Name Declarations, where the Variable Field is homograph of country code contained in the ISO 3166-1 list the organization ISO (ISO 3166-1), is not considered void.

ix. If the Variable Field of a 2nd level [.gr] Domain Name or of a Common Use 3rd level [.gr] Domain Name consists of alphanumeric characters that make up any element the use of which has been deemed as running contrary to public order and/or good morals, unless otherwise deemed by an EETT Decision.

x. If the Variable Field of a 2nd level [.gr] Domain Name or of a Common Use 3rd level [.gr] Domain Name is the same as a term included in the list of terms that it is deemed that constitute elements and/or any official terms of the Greek State and/or of the other States and/or international organisations and/or entities referred to in Article 6 three of the Paris Convention on Industrial Property, as well as any highly symbolic element, including in particular religious symbols and words, unless otherwise deemed by an EETT Decision.

xi. If the data included in the registration declaration submitted according to the present Decision do not identify the Holder as a governmental organisation entitled to the assignment of a Common Use 3rd level [.gov.gr] Domain Name.

2. The provisions of items (vii) and (viii) of paragraph 1 of the present Article aim at preventing the assignment of any exclusive rights to [.gr] Domain Names disproportionate to the purpose justifying such assignment in accordance with the present Regulation, and at limiting these exclusive rights to [.gr] Domain Names to the extent absolutely appropriate for serving the purpose justifying their assignment in accordance with the present Decision.

Article 8
Grounds for deletion of assigned [.gr] Domain Names

1. A [.gr] Domain Name shall be definitively deleted when one or more of the following limitedly specified cases apply:

a. If the Holder requests such deletion by a relevant declaration (Annex XII) submitted to the Registry through the Registrar managing the specific [.gr] Domain Name.

b. If by operation of law or following a complaint made by a third party that has a vested legal interest to do so, it is ascertained that one or more of the following limitedly specified cases apply:

i. If the registration declaration was not accurate as to its mandatory fields, and in particular in case:

a. the data included in the registration declaration and thereby registered in the Register do not identify the Holder; and/or

b. the content of the solemn statement submitted along with the registration declaration proves to be false in any way.

ii. If the Variable Field of a [.gr] Domain Name is identical to – or similar enough to create confusion with – a name to which any other right already exists based on any national or community legislation, and the specific [.gr] Domain Name:
a. has been registered by a Holder that has no right or vested legal interest to that name; and/or
b. has been registered or is used in bad faith.

iii. If there are grounds that would disallow the assignment of the specific [.gr] Domain Name according to Article 7 hereof, except if the [.gr] Domain Name had been assigned prior to 3012-2002. The case of item (vii) of paragraph 1 of Article 7 hereof as grounds for deletion shall pertain only to [.gr] Domain Names assigned after the 8th of August 2011.

iv. In case the Holder does not comply with its obligation to declare any change in the assignment data, as provided for in paragraph 2 of Article 9 hereof, and the period of thirty (30) days after the temporary deactivation of the name – allowed to the Holder in order to give notice of any such change – expires.

v. If the registration declaration for the assignment of a [.gr] Domain Name has been made in violation of the principles of good faith, except if the [.gr] Domain Name had been assigned prior to 30-12-2002.

vi. In case the Holder has used the [.gr] Domain Name in any way that runs contrary to the principles of good faith or is malicious, and in particular if the Holder has allowed or tolerated any third party use of the specific [.gr] Domain Name or of a 3rd or higher level [.gr] Domain Name that consists of the [.gr] Domain Name assigned to the Holder in any way that would constitute grounds for the deletion of this [.gr] Domain Name according to the present Article.

vii. In case the Holder is a legal person that has been dissolved.

viii. In case the Holder is a natural person that has passed away, as long as none of the natural person's legal heirs or will executors request within twelve (12) months from the date of the natural person's death the transfer of the [.gr] Domain Name as a result of universal succession, according to Annex VIII attached hereto.

ix. In case the Holder of a [.gr] Domain Name is a legal person that pursuant to relevant legalising documents has ceased to exist and has been succeeded in any way by another person with respect to its rights and obligations as Holder of the specific [.gr] Domain Name, as long as the new Holder does not request within six (6) months form the date of succession to such rights and obligations according to the legislation in

force the transfer of the [.gr] Domain Name to the new Holder according to Annex VIII attached hereto.

    x.   In case the [.gr] Domain Name constitutes any element and/or official term of the Greek State and/or of the other States and/or international organisations and/or entities referred to in Article 6 three of the Paris Convention on Industrial Property, as well as any highly symbolic element, including in particular religious symbols and words.

    xi.   In case the specific [.gr] Domain Name runs contrary to public order and/or good morals.

    c.   Following an irrevocable court ruling, or a corresponding arbitration body decision enforceable in Greece, that orders the deletion of a specific [.gr] Domain Name.

2. In case a [.gr] Domain Name is deleted or temporarily deactivated, any form of the assigned Domain Name automatically reserved according to paragraphs 7 and 8 of Article 3 hereof shall also be deleted and temporarily deactivated.

3. In case of:

    a.   an EETT Decision with respect to a call to a hearing regarding the deletion or the transfer of a [.gr] Domain Name, or

    b.   a notification of any pending legal procedure regarding the deletion or the transfer of a [.gr] Domain Name,

EETT shall forbid the transfer of that [.gr] Domain Name to any third person, until:

    i.   the issuance of ann EETT Decision or court ruling, or of a corresponding non appealable arbitration body decision enforceable in Greece, or

    ii.   the expiry of the registration period, as long as this occurs prior to the completion of the relevant EETT hearing procedure or court proceedings while the [.gr] Domain Name has not been renewed.

4. Any reserved [.gr] Domain Name activated following a declaration by the Holder under the Regulation in force according to the provisions of items 1.b (ii), (iii), (v), (vi), (x) and (xi) of subparagraph (b) of paragraph 1 of the present Article, may be deactivated following a complaint made by a third party that has a vested legal interest and the issuance of an EETT Decision, as well as in case of an irrevocable court ruling, or of a corresponding non appealable arbitration body decision enforceable in Greece, that orders the deactivation of the specific [.gr] Domain Name.

5. In case EETT ascertains, by operation of law or following a complaint made by a third party, that a new declaration for the registration of a [.gr] Domain Name or for the activation of a reserved [.gr] Domain Name has been registered in the Register unaccompanied by any justification by the same person for which the Domain Name in question had been deleted or deactivated by an EETT Decision or a court ruling, the registration or activation of the [.gr] Domain Name in question shall be re-examined in the light of the present Article and in case the new registration or

activation declaration is unjustifiable the [.gr] Domain Name shall be deleted or deactivated by an EETT Decision.

Article 9
Temporary deactivation of an assigned [.gr] Domain Name

1. A [.gr] Domain Name shall be temporarily deactivated by a Decision issued by the EETT President or his/her legal representative, in the following cases:

    a. if there is a court ruling or temporary court order enforceable in Greece that orders its temporary deactivation, or

    b. if there is evidence of grounds for deletion according to Article 8 hereof, subject to the provision of paragraph 6of Article 77 of Law 4070/2012, as currently in force, and to the Regulation regarding the Procedure on Taking Interim Injunction Measures by EETT (EETT Decision 272/64/10.1.2003 (Gov. Gaz. Issue 158/B/2003)), as applicable each time.

    The deactivation shall apply until the issuance of anEETT Decision or court ruling, or of a corresponding arbitration body decision enforceable in Greece, that orders the deletion of the specific Domain Name or its revocation and assignment to a third party, or until the expiry of its assignment period as long as this occurs prior to the issuance of the EETT Decision or court ruling or of a corresponding arbitration body decision while the [.gr] Domain Name has not been renewed. During the period in which the [.gr] Domain Name is deactivated, its Holder has the right to submit a declaration for the deletion and/or change of Registrar of the [.gr] Domain Name, unless otherwise determined by an EETT Decision, as well as a declaration for the renewal or a change in the data of the [.gr] Domain Name.

2. In case EETT ascertains that the Holder has not complied with its obligation to declare any change in the assignment data as provided for in paragraph 8 of Article 11 hereof, by a Decision issued by the EETT President or his/her legal representative, EETT shall be entitled to temporarily deactivate the [.gr] Domain Name for a period of thirty (30) days. Within this period, the Domain Name Holder shall be required to submit to the Registry through the Registrar a notification of any change in the assignment data, as well as the relevant legalising documents that verify the correctness of the submitted data. In case the Holder complies with its obligation within the above time limit, by a Decision of the EETT President, EETT shall be entitled to end the temporary deactivation; in any other case it shall be entitled to delete the [.gr] Domain Name by an EETT Decision.

3. In case of announcement to EETT of any pending legal proceedings for temporarily deactivation of the Domain Name Gr , EETT shall forbid the transfer of that [.gr] Domain Name to any third person until:

i. the issuance of a court ruling or of a corresponding arbitration body decision enforceable in Greece that orders the deactivation of the [.gr] Domain Name, or

ii. the expiry of the registration period, as long as this occurs prior to the completion of the relevant EETT hearing procedure or court proceedings while the [.gr] Domain Name has not been renewed.

4. Any temporarily deactivated Domain Name shall be terminated upon expiry of the exclusive right of use and reservation assigned in accordance with the present Decision.

5. Any deletion or temporary deactivation of a [.gr] Domain Name shall entail at the same time the termination of use or temporary deactivation, as per case, of any 3rd or higher level [.gr] Domain Names made up of the deleted or temporarily deactivated [.gr] Domain Name.

CHAPTER IV
REGISTRATION PROCEDURE

Article 10
Procedure for the registration and assignment of [.gr] Domain Names

1. Any person wishing to be assigned a specific [.gr] Domain Name shall be required to fill out and submit a registration declaration in written or electronic form, supplying all information necessary for such purpose. The registration declaration is described in Annex V attached hereto. Each [.gr] Domain Name may be assigned to a single natural or legal person, with no possibility of co-assignment to more than one natural or legal persons.

2. The registration declaration shall be accompanied by a solemn statement by the Registrant, asserting:

   a. that all data declared are accurate and true;

   b. in the case of a legal person, that the declaration shall be binding upon the specific legal person;

   c. that to the best of the Registrant's knowledge the assignment of the [.gr] Domain Name in question does not violate the rights of any third parties;

   d. in case the Variable Field of the 2nd level [.gr] Domain Name is the same as a geographical term included in the list of geographical terms published on the EETT website in its Greek and Latin form (according to Annex XIV attached hereto), that the Registrant is the corresponding Local Government Organisation entitled to it;

   e. in case of a registration declaration for a [.gov.gr] Domain Name, that the Registrant is a governmental organisation.

   In case the Registrant is a natural or legal person residing or having its registered offices abroad, EETT shall dispatch any documents only to the electronic address declared in the Register.

EETT submits any document to the Registrant at the electronic address he/she has stated in the Registry. EETT may use any other appropriate method of communicating documents.

3. All registration declarations shall be submitted by the Registrant to one of the Registrars included in the List of Registrars that EETT shall maintain, publish and occasionally amend, according to Article 16 hereof.

4. The Registrar shall forward the registration declaration data to the Registry within one (1) working day, electronically via the Internet and using an appropriate software application provided by the Registry, according to Annex V attached hereto. This software application shall enable the identification of both the Registrar and the Registry and shall ensure non alteration of any information shared between the Registrar and the Registry through the use of appropriate software applications and security methods.

5. The Registrars shall be required to make known to the Registrants by any suitable means and in any case prior to the submission of a registration declaration, and to publish on a conspicuous location on their website:
    a. that the time priority of the registration declarations submitted by the Registrants is only ensured upon the assignment of a reference number to them by the Registry, and not upon their submission to the Registrar; and
    b. their method of communication with the Register and the period that may be required for a submitted registration declaration to be forwarded to the Registry and assigned a reference number by it, which in any case must not exceed one (1) working day, as set forth in paragraph 4 of the present Article.

6. Upon submission of the registration declaration, the Registry shall automatically assign to each registration declaration a reference number stating the exact date, hour and minute of submission, and shall certify the submission of the specific registration declaration using the specific reference number, date, hour and minute of the declaration's submission. The time priority of the registration declaration shall be based on the assignment of such a reference number to it by the Registry.

7. The Registry, electronically via the Internet and using the software application mentioned in paragraph 4 of the present Article, shall notify the Registrar with respect to the registration declaration data, the reference number, and the date, hour and minute of submission.

8. Within one (1) working day from the notification of the registration declaration data by the Registry, the Registrar shall be required to provide the Registrant with a document proving the submission of the registration declaration that shall state the [.gr] Domain Name declared, the Registrant's Name, the reference number, and the date, hour and minute of submission of the registration declaration, as these data were sent by the Registry.

9. Immediately upon submission of the registration declaration, the Registry shall examine whether the declaration is void according to Article 7 hereof, and if it is not the [.gr] Domain Name shall be temporarily activated and assigned within six (6) days. Particularly in the cases of items (vii) and (xi) of paragraph 1 of Article 7 hereof, the Registrant shall be notified within twenty (20) days from the forwarding of the registration declaration to the Registry with respect to whether the registration declaration is void. During the period up to the Registrant's notification no temporary activation of the Domain Name shall be carried out.

10. In case of incorrect submission of the declaration, or following a request by the Registrant, or in case of non payment of the respective legal fees by the Registrant, the Registrar shall have the right to withdraw the registration declaration within five (5) days from its submission to the Registry free of charge.

11. In any case the Registrar shall keep in electronic or written form all documents (original or not) accompanying the registration declaration.

12. After the forwarding of the registration declaration by the Registrar to the Registry and the expiry of the time limit of five (5) days allowed according to paragraph 10 of the present Article, the [.gr] Domain Name for which the registration declaration was submitted shall be assigned, unless the registration declaration is void according to paragraph 9 of the present Article. The Registry shall notify the Registrant, via e-mail sent to the electronic address declared in the registration declaration, with respect to whether the registration declaration is void or the [.gr] Domain Name has been assigned.

13. The [.gr] Domain Name shall be definitively activated upon its assignment.

Article 11
Changes in the assignment data

1. All [.gr] Domain Name Holders shall have the right to change the data that pertain to the [.gr] Domain Name assigned to them, as well as their corporate name or name, according to the procedure described in paragraph 3 of the present Article. Any change in the data that pertain to the assigned [.gr] Domain Name shall entail a corresponding change in the data that pertain to:
   a. any form of the assigned [.gr] Domain Name automatically reserved according to paragraphs 7 and 8 of Article 3 hereof; and
   b. any reserved form of the assigned [.gr] Domain Name activated following a relevant declaration by the Holder.

2. All changes in the data that pertain to the [.gr] Domain Name and/or changes of the Holder's name and/or corporate name shall be carried out through the Registrars.

3. The Registrar shall take delivery of the Holder's 'Data Change Declaration' according to Annex VI attached hereto, or of the 'Holder's Corporate Name / Name Change Declaration', which requires verification

of the Holder's identity, according to Annex IX attached hereto. The above declarations shall be submitted in electronic or written form. The Registrar shall verify that the person submitting the Holder's 'Data Change Declaration' or 'Holder's Corporate Name / Name Change Declaration' is indeed the Domain Name Holder, either by checking the authorisation code and/or other information proving the Holder's identity (Tax Registry Number, police-issued ID card, etc.) or through the use of a state-of-the-art electronic signature based on a recognised certificate, and shall thereafter electronically forward within one (1) working day the Holder's 'Data Change Declaration' or 'Holder's Corporate Name / Name Change Declaration' to the Registry, provided that the Holder of the [.gr] Domain Name has paid the legal fees.

4. In case of any change in the data of the assigned [.gr] Domain Name or change of the Holder's name and/or corporate name, the Registry shall automatically update its files with the data of the [.gr] Domain Name that have changed and shall proceed, as applicable, with the corresponding technical changes required in the Domain Name Servers.

5. Any 'Holder's Corporate Name / Name Change Declaration' shall constitute a chargeable act and shall be submitted by the [.gr] Domain Name Holder to the Registrar. A template declaration is provided in Annex IX attached hereto.

6. In any case the Registry shall inform the Holder, via e-mail sent to the electronic address declared in the 'Holder's Corporate Name / Name Change Declaration', with respect to the registration of the change in the Holder's name and/or corporate name in the Register.

7. In case EETT ascertains, by operation of law or following a complaint made by a third party, that an act that runs contrary to the provisions hereof has been carried out in the Register for the change of a Holder's name and/or corporate name, it shall be entitled to annul the act in question and revert the [.gr] Domain Name to the Holder's data as these had been registered in the Register prior to the registration of the corporate name / name change act in question.

8. The Holder shall be required to ensure that it informs both the Registrar and the Registry with respect to all the changes carried out either in the corporate name / name of the Holder or in any other registration data of the [.gr] Domain Name, as described in the present Decision, and within one (1) month from the change in the data that were included in its declaration.

Article 12
Change of Registrar

1. At any time, the [.gr] Domain Name Holder shall be entitled to change its Registrar, if it so wishes. Any change of the Registrar of the assigned [.gr] Domain Name shall entail at the same time a corresponding change of the Registrar of:

a. any form of the assigned [.gr] Domain Name automatically reserved according to paragraphs 7 and 8 of Article 3 hereof; and

b. any reserved form of the assigned [.gr] Domain Name activated following a relevant declaration by the Holder.

2. In such a case, the applicable procedure shall be as follows:

a. The Holder shall fill out and submit to the Registrar of its choice a declaration in written or electronic form, requesting the transfer to such Registrar of all the data that pertain to the assignment of the specific [.gr] Domain Name and entrusting with it all the activities of a Registrar regarding the specific [.gr] Domain Name, according to Annex I attached hereto.

b. The new Registrar shall verify the identity of the applicant for the change of Registrar, and in case of a legal person shall make sure that the declaration is signed by the applicant's legal representative. The new Registrar shall check that the new authorisation code is different from the existing authorisation code. In case the new Registrar ascertains that the applicant for the change is not the [.gr] Domain Name Holder or a legal representative thereof, or that the new authorisation code is the same as the existing authorisation code, then the Registrar shall not forward the declaration to the Registry.

c. Thereafter, the new Registrar of the Domain Name shall issue and immediately dispatch to the [.gr] Domain Name Holder a document proving the delivery of the declaration for the change of Registrar, which shall state at least the following information:

(i)   the corporate name of the Registrar of the Domain Name;

(ii)   the Registrar's Tax Registry Number, postal address, telephone number, website addresses (URL) and e-mail address;

(iii) the corporate name of the [.gr] Domain Name Holder;

(iv)   the [.gr] Domain Name Holder's postal address and telephone number;

(v)   the [.gr] Domain Name for which the declaration has been submitted;

(vi)   the exact date, hour and minute of delivery of the declaration for the change of Registrar of the Domain Name.

d. Thereafter the new Registrar shall inform the Registry that the [.gr] Domain Name Holder has submitted a declaration for the change of Registrar, and shall change the authorisation code of the [.gr] Domain Name by registering a new Domain Name Authorisation Code – which shall be included in the declaration for the change of Registrar – within three (3) working days from the submission of the declaration for the change of Registrar. The Registry shall electronically inform the former Registrar with respect to the declaration for the change of Registrar, and as the Registrar change procedure is thereby completed, the Domain Name shall be assigned to the new Registrar.

e. The former Registrar, as soon as it is informed with respect to the submission of the declaration, shall cease using in written or electronic form the data of the [.gr] Domain Name Holder, unless it has obtained the Holder's prior consent to do so, according to the legislation in force.

3. The new Registrar shall be entitled to demand from the Registrant the payment of fees for the change of Registrar procedure.

4. No change of Registrar of any [.gr] Domain Name shall be carried out throughout the period in which there are any pending requests of a [.gr] Domain Name Holder that pertain to a Domain Name transfer. A [.gr] Domain Name renewal declaration can be submitted to a new Registrar without any requirement for a declaration for the change of Registrar with respect to Domain Names that lie passed the expiry date of their exclusive right of use but within fifteen (15) days from such expiry. A declaration for the renewal of [.gr] Domain Names that lie within the expiry date of their exclusive right of use shall be submitted to the Registrar managing the Domain Name or to a new Registrar in case a declaration for the change of Registrar is submitted prior to the renewal declaration.

CHAPTER V
DURATION OF THE RIGHT – TRANSFER

Article 13
Duration of the assignment and renewal

1. The exclusive right of use acquired upon assignment of a [.gr] Domain Name shall have a duration of two (2) years from the date of submission of the registration declaration in the Register, while the right of reservation shall have an additional duration of fifteen (15) days from the expiry of the exclusive right of use. With respect to the reserved forms of the [.gr] Domain Name assigned, the right of activation shall have a duration of two (2) years from the date of submission of the registration declaration, while the right of reservation shall have an additional duration of fifteen (15) days from the expiry date of the right of activation.

2. The exclusive right of use acquired with respect to [.gr] Domain Names that had been reserved for a specific Holder and were activated following a relevant declaration by the Holder, shall have a duration of two (2) years from the date of submission of the registration declaration for the assignment of the [.gr] Domain Name based on which the Domain Names in question were reserved for the Holder, and not from the date of their activation, while the respective right of reservation shall have an additional duration of fifteen (15) days from the date of submission of the registration declaration for the assignment of the [.gr] Domain Name based on which these Domain Names were reserved for the Holder.

3. Any assignment may be constantly renewed for successive assignment periods according to paragraph 1 of the present Article. The Holder shall be entitled to renew the assignment for more than one assignment periods.

4. For the renewal of a [.gr] Domain Name its Holder shall be required to submit a relevant declaration to the Registrar within the time limit set forth in subparagraph (c) of paragraph 1 of Article 4 hereof, accompanied by the relevant legal fees. In any case, the duration of the exclusive right of use and reservation acquired by the Holder upon renewal of the assignment shall start from the expiry date of the exclusive right of use of the previous assignment period, and not from the date of submission of the renewal declaration.

5. Any renewal of the assigned [.gr] Domain Name shall entail at the same time a corresponding renewal of any form of the assigned Domain Name automatically reserved according to paragraphs 7 and 8 of Article 3 hereof, as well as of all the reserved forms of the assigned [.gr] Domain Name that were activated following a declaration by the Holder. In case the Holder does not wish to renew a reserved form of the assigned [.gr] Domain Name that was activated following a declaration by it, it shall be required to apply for the deactivation of the form in question prior to the renewal of the [.gr] Domain Name. In case of [.gr] Domain Names that lie passed their expiry date but within their reservation period, the renewal declaration shall pertain to the entire group of forms of the [.gr] Domain Name, including any activated Domain Name forms, and shall entail the corresponding charges.

6. The Registrar shall be required to forward the declaration for the renewal of a [.gr] Domain Name to the Registry within one (1) working day form its delivery and in any case prior to the expiry of the exclusive right of renewal, as this is set forth in subparagraph (c) of paragraph 1 of Article 4 hereof.

7. The renewal shall be carried out upon registration of the declaration in the Register.

8. Upon expiry of the exclusive right of use, the Domain Name and all its reserved forms shall be temporarily deactivated for fifteen (15) days without any prior EETT Decision, while upon expiry of the reservation period the [.gr] Domain Name shall be definitively deactivated and left unreserved. The procedure for releasing the domain names takes place within the next twenty-four hours of the expiration of the periond of the fifteen days.

9. No [.gr] Domain Name renewal can be carried out throughout the period in which there are any pending declarations of the [.gr] Domain Name Holder that pertain to a Domain Name transfer.

Article 14
Transfer of [.gr] Domain Names

1. A transfer may be carried out in the Register in the following cases:

a. In case of a transfer declaration submitted through the Registrar to the Registry either:

   i. by both the interested parties, i.e. the transferor (and Holder of the [.gr] Domain Name up to the time of registration of the transfer declaration) and the transferee; or

   ii. by the transferee (the new person to which the exclusive right of use and reservation has been transferred), in the cases of items (viii) and (ix) of paragraph 1 of Article 8 hereof.

In such a case, the applicable procedure shall be as follows:

1. The interested parties shall submit to the Registrar of the Holder of the Domain Name about to be transferred a transfer declaration according to Annex XIV attached hereto, accompanied by the legal fees provided for each time. The transfer declaration shall have to be clear, irrevocable and unconditional.

2. In case the declaration pertains to a 2nd level Domain Name the Variable Field of which is the same as a geographical term included in Annex XII attached hereto, or to a Common Use 3rd level [.gov.gr] Domain Name, the transfer declaration shall be forwarded to the Registry at the latest within thirty (30) days prior to the expiry of the [.gr] Domain Name.

3. Any transfer declaration may be submitted in accordance with the present Decision in written or electronic form. The declaration and the documents accompanying it shall be kept in a file by the Registrar.

4. Upon submission of the declaration the Registrar shall check whether the requirements of item 1 of subparagraph (a) of paragraph 1 of the present Article are met. In addition, the Registrar shall verify that the transferor is indeed the [.gr] Domain Name Holder, either by checking the authorisation code and/or other information proving the Holder's identity (Tax Registry Number, police-issued ID card, etc.) or through the use of a state-of-the-art electronic signature based on a recognised certificate. In case the above requirements are not met, the Registrar shall not forward the declaration to the Registry.

5. The Registrar, within an exclusive time limit of three (3) days from the submission of the transfer declaration, shall forward the declaration to the Registry, provided that the Holder of the [.gr] Domain Name has paid the legal fees.

6. In case of declarations for the transfer of an assigned 2nd level Domain Name the Variable Field of which is the same as a geographical term included in Annex XIV attached hereto, or of a Common Use 3rd level [.gov.gr] Domain Name, the Registry, within twenty (20) days form the reception of the declaration, shall examine whether the transfer declaration

should be rejected as void based on any of the following grounds:

a. if the new Holder is not a Local Government Organisation as required under item (vii) of paragraph 1 of Article 7 hereof; and

b. if the new Holder is not a governmental organisation as required under item (xi) of paragraph 1 of Article 7 hereof.

In any of the above cases, the transfer declaration shall be considered void, while otherwise the declaration shall be registered and the Registry shall automatically update its files with the data of the [.gr] Domain Name that have changed.

The Registry shall inform the interested parties via e-mail sent to the electronic addresses declared in the transfer declaration with respect to whether the declaration is void or has been accepted.

b. In case of an EETT Decision, that orders the revocation of the Holder's exclusive right to use and reserve a specific [.gr] Domain Name and the transfer of such right to the complainant / applicant for the transfer on the basis of any of the grounds referred to in items (i: case b), (ii), (iii), (iv), (v), (vi), (vii), (viii), (ix), (x), or (xi) of subparagraph (b) of paragraph 1 of Article 8 hereof. In such case the complainant / applicant for the transfer shall also submit the information proving its identity according to the template of Annex XIII attached hereto. The cost of the transfer declaration is covered by the fee paid for the hearing taking place after the submission of a complaint to EETT according to art. 20 par. 8 hereof. c. In case of a court ruling, or of a corresponding non arbitration body decision enforceable in Greece, that orders the revocation of the Holder's exclusive right to use and reserve a specific [.gr] Domain Name and the transfer of such right to a third party. In such case the third person in question shall be required to submit to EETT the relevant ruling / decision along with the information proving its identity according to the template of Annex XIII attached hereto. The cost of the transfer declaration shall be covered by the transferee and shall be deposited to EETT according to the template of Annex IV case c attached hereto. The Registry shall inform the interested parties, via e-mail sent to the electronic addresses declared in the Register, with respect to the registration of the transfer in its files.

2. Upon transfer, the transferor shall waive its right under the present Regulation, which shall thereupon be acquired by the person to which it is transferred. Any transfer of an assigned [.gr] Domain Name shall also entail at the same time the transfer of any form of the assigned Domain Name automatically reserved according to paragraphs 7 and 8 of Article 3 hereof, as well as of any reserved forms of the assigned [.gr] Domain Name that were activated following a declaration by the Holder. Any reserved forms, activated or not, cannot be subject to a separate transfer

on their own. In any case, an EETT Decision or court ruling that transfers a reserved form of a Domain Name shall transfer at the same time the main Domain Name and the entire group of all other reserved [.gr] Domain Names.

3. In case the transferor has allowed or tolerated the use of a [.gr] Domain Name assigned to it and about to be transferred as a constituent of a 3rd or higher level [.gr] Domain Name according to Article 5 hereof, it shall be required to inform the person to which it wishes to transfer the exclusive right of use of the [.gr] Domain Name with respect to such use prior to the submission of the declaration according to paragraph 2 of the present Article to the Registrar.

4. In case, following a declaration by the Holder, the transfer of a [.gr] Domain Name is carried out in the Register by an EETT Decision or court ruling or arbitration body decision enforceable in Greece, the new Holder, if it has accepted the use of the transferred [.gr] Domain Name as a constituent of a 3rd or higher level [.gr] Domain Name as allowed and tolerated by the transferor, it shall succeed the former Holder to its rights and obligations according to Article 5 hereof regarding the use of 3rd or higher level Domain Names without assignment.

5. No [.gr] Domain Name transfer can be carried out in the Register in the cases set forth under paragraph 3 of Article 8 and paragraph 3 of Article 9 hereof.

CHAPTER VI
PROVISIONS REGARDING THE REGISTRY

Article 15
Obligations of the Registry

1. The Registry shall act based on the provisions agreed upon and approved by EETT, as well as according to the principles of non discrimination and assurance of transparency and objectivity.

2. The Registry shall inform the Registrant, via e-mail sent to the electronic address declared in the latter's declaration, with respect to whether:
   a. the registration declaration is void or the [.gr] Domain Name has been assigned;
   b. the transfer declaration is void or has been registered in the Register;
   c. the declaration for the change of the Holder's corporate name was registered in the Register;
   d. the declaration for the activation of a reserved [.gr] Domain Name was registered in the Register;
   e. the declaration for the renewal of a [.gr] Domain Name was registered in the Register;
   f. the declaration for the deletion of a [.gr] Domain Name was registered in the Register.
   g. the declaration of Registrar change was registered to the Registry

3. The Registry shall activate or deactivate, temporarily or definitively, the [.gr] Domain Names whenever and as provided for in accordance with the present Decision and in the way provided for by EETT from time to time.

4. The Registry shall keep files of the [.gr] Domain Names, which shall include all data related to the activation / assignment of the [.gr] Domain Names, such as the description of the [.gr] Domain Names, the time priority order of the registration declarations, the identity of the Registrants / Holders, the time of assignment, or any data related to other acts provided for in accordance with the present Decision, as well as data related to the identity of the Registrar mediating the act in question. The Register files shall be kept at least in electronic form, using an appropriately structured database (Register). Upon a relevant request by EETT, the Registry shall be required to extract these data from the Register in such appropriate electronic format as shall be determined by EETT.

5. The Register files shall be made available by the Registry in an on-line form, so as to ensure the access of EETT thereto at any time. The means of access shall be commonly agreed upon between the Registry and EETT.

6. With the exception of any personal data of Registrants and/or Holders that have requested non disclosure thereof, all Register data shall be communicated upon request.

7. The Registry shall be responsible for the proper function, management and technical support of all the Domain Name Servers necessary for the [.gr] domain, whether located in Greece or not, as well as for the system's constant updating and modernisation, so as to guarantee the satisfaction of all future needs of the [.gr] domain or of any other domain that may be given to the Greek State.

8. Upon a relevant request by EETT, the Registry shall be required to extract the data kept in the zone files of the primary Domain Name Server for the [.gr] domain in such appropriate electronic format as shall be determined by EETT.

9. The Registry shall undertake to set up, manage and operate a website, so as to provide Internet users with information on the procedures related to the [.gr] Domain Names as well as with a [.gr] Domain Name public search service.

10. The Registry shall be entitled to supply to every Registrant / Holder of a [.gr] Domain Name the registration data thereof according to the Register, as these stand at the specific time their notification is requested upon entry of the authorisation code of the specific Domain Name in the Register. The right to supply the above registration data to the Registrant / Holder of the Domain Name may also be granted to any Registrar for the [.gr] Domain Names it manages, following the issuance of a relevant EETT Decision.

11. The Registry shall undertake to set up, manage and operate the necessary infrastructure (website, e-mail service, call centre, etc.) and to develop an appropriate software in order to enable EETT and the Registrars to proceed to the actions required in accordance with the present Decision using secure methods.

12. The Registry shall not act as a Registrar, unless otherwise determined in the present Regulation. EETT reserves the right to carry out in the Register acts that pertain to any mandatory change of corporate name / name or transfer or deletion or temporary deactivations / restrictions that result from the implementation of any ruling or decision issued by a court, an arbitration body or EETT itself. In order to carry out these acts, EETT shall be entitled to demand from the Holders the payment of the corresponding fees.

13. EETT may keep the Register on its own or assign its management to any other legal person (Registry) through a tender procedure.

14. The Registry shall be entitled to immediately discontinue the access of any Registrar that creates problems to the Register's systems and services (cases of abuse of the Whois service, DoS / DDoS, abuse of Register resources, incorrect registration of [.gr] Domain Name data, code injections, and any other case that may endanger the smooth operation of the Register's systems and services).

15. The Registry shall be entitled to set restrictions on the number of parallel connections allowed per Registrar, on the number of acts carried out through the Extensible Provisioning Protocol (EPP), and in general on any other parameter of the system in order to ensure its smooth operation.

16. In case EETT has assigned the Register's management to another legal person (Registry), all data kept by the Registry shall belong to EETT and shall be made available to it in electronic format upon a relevant request by EETT, and in any case upon termination of the Register management assignment to the specific legal person by EETT, irrespective of the grounds on which such termination occurs.

17. The Registry shall be entitled to provide additional security services to the Holders of [.gr] Domain Names.

18. Any temporary discontinuation of the Registrars' access to the Register for reasons pertaining to the security of the Register data, the assurance of the Register's smooth operation or any abuse of access rights on the part of the Registrar, shall not generate any right of the Registrar to indemnification for any direct or indirect losses.

19. The Registrars' access to the Register shall not be guaranteed throughout the day (24 hours), as it shall be subject to technical restrictions that may be causing delays and interruptions, such as on-line attacks and/or temporary network failures.

CHAPTER VII
PROVISIONS REGARDING THE REGISTRARS

Article 16
Operation of the Registrars

1. The Registrars shall be persons that meet the requirements set forth from time to time by EETT and referred to in Annex II attached hereto, as applicable each time.

2. Any persons that meet the requirements of Annex II attached hereto and wish to become Registrars shall proceed with a simple notice sent to EETT. A template notice is included in Annex Z attached hereto. The notice shall be accompanied by a solemn statement of the person submitting it – or its legal representative in case of a legal person – that they fully accept all the obligations and meet all the EETT criteria stemming from the present Regulation. The notice shall be submitted exclusively through the Electronic Application Submission System for Electronic Communication Providers. In the course of this electronic submission the Registrar shall be required to also send electronically to EETT all the documents that need to be attached to the declaration as per case. In case the Registrar's notice sent is incomplete, the person submitting it shall not be registered in the EETT List of Registrars. To access the Electronic Application Submission System for Electronic Communication Providers the applicant shall submit an Administrator's declaration according to the provisions of a specific relevant EETT Decision. The requirements to be set forth by the present Decision shall be published on the relevant location of the EETT website.

3. EETT shall register every complete notice in the List of Registrars it keeps, and shall immediately publish the Registrar's data in the Register and on its websites, according to Annex XIII attached hereto. Upon publication as described above, the person submitting the notice shall be entitled to operate as a Registrar.

4. In case of any change in the data declared in the notice submitted to EETT, the Registrar shall be required to inform EETT in this respect through the Electronic Application Submission System for Electronic Communication Providers within ten (10) days from the change.

5. EETT may disclose any documents at the electronic address stated in the Registry.

Article 17
Obligations of the Registrars

1. The relationships of the Registrars with the applicants for the assignment of [.gr] Domain Names and other Registrars shall be governed by the principles of good faith and good morals, as well as by the overall spirit of the present Regulation and the applicable legislation on competition and on consumer protection and personal data protection.

2. The Registrars shall be required to activate their connection with the Register within a period of three (3) months from the publication of their data in the Register. In case the connection with the Register is not

activated within three (3) months, the Registrar shall be deleted immediately by an EETT Decision, without conducting hearings.

3. In any case, without conducting a hearing, if brought to EETT's knowledge any official documents and information concerning the decommissioning of Registrars, EETT may on its own initiative without further notice delete the registrars. n this case, EETT informs the registrants via e-mail address submitted for their deletion.
4. The Registrars shall be required to abide by the templates of Annexes V to XII attached hereto, as well as Annex IZ attached hereto, and particularly to demand from Registrants to submit the relevant solemn statements described therein, with the content specified therein.
5. The Registrars shall be required to keep a file containing all documents (written or electronic) that Registrants submit to them from time to time, the relevant fee payment receipts, as well as any other document sent by the Registry or EETT to the Registrar and related to the corresponding [.gr] Domain Name. The files are kept by the Registrar for the entire period that he manages the domain name and for six months after the expiration of the Domain Name, or the transfer of the domain name to another Registrar. EETT shall be entitled to request at any time from the Registrars any of the documents that they keep and are related to [.gr] Domain Names. The Registrars shall forward the documents requested to EETT within twenty four (24) hours.
6. To the extent possible, the Registrar's files shall also be kept in electronic form using an appropriately structured database. Upon a relevant request by EETT, the Registrar shall be required to extract these data from the database in such appropriate electronic format as shall be determined by EETT.
7. The Registrars shall be required to proceed to all the actions necessary in accordance with the present Decision, within the time limits set forth in the present Decision. Any time limits for the submission of declarations for chargeable acts as specified in accordance with the present Decision shall start with the payment of the legal fees specified in Annex IV attached hereto by the Registrant to the Registrar.
8. The Registrars shall be required to inform the Registrants / Holders of [.gr] Domain Names with respect to any information made known to them by the Registry or EETT and related to the corresponding [.gr] Domain Name. The Registrars shall notify the Holders with respect to the expiry of their [.gr] Domain Names at least two (2) months prior to the expiry, via e-mail sent to the electronic address declared in the registration declaration.
9. The Registrars shall be required to have a website and to make available their contact details in full, reference to the Registry Number Of EETT as well as a consumer service line that shall operate on working days from 9:00 am to 4:00 pm. Particularly the Registrars that are already included in the List of Registrars published on the EETT website prior to the

publication of the present Decision in the Government Gazette, shall be required to send within a period of one (1) month from the publication hereof, the details of their consumer service line. All Registrars shall ensure that they have appropriate mechanisms and sufficient human resources employed in the service of their Registrants, so that a Registrant calling the Registrar's support centre would not be kept waiting for an excessively long time, which advisably should not exceed five (5) minutes.

10. The Registrars shall be required to proceed, upon request, to any action necessary in accordance with the present Decision in order to serve the Registrants. The Registrars shall abstain from any practices that prevent Registrants from freely contacting any Registrar they wish or replacing the Registrar they currently use.

11. The Registrars shall be required to pay to EETT the legal fees set by EETT according to Annex IV attached hereto.

12. For the payment of the legal fees, the Registrar shall be required to use a subsystem of the Register. Through this system, the amount of money paid by the Registrar to EETT shall be converted in and matched with equivalents of chargeable operations (units). The total of units shall correspond to the deposited amount of money, based on the formula "integral number of units = deposited amount / cost of chargeable act". Any balance shall remain outstanding until the next deposit made by the Registrar, at which time it shall be added to the new amount and the above formula shall be applied for a recalculation. The units created shall correspond to chargeable acts that the Registrar carries out in the Register. The acts corresponding to the units can be carried out at any moment, without any time restriction.

13. The units shall be reduced per each chargeable act. The Registrar shall have the right to carry out chargeable acts in the Register while having zero units for a period of five (5) calendar days. These acts shall be calculated as negative units. Upon expiry of the above period, the Registrar's ability to carry out chargeable acts in the Register shall be discontinued on the next working day at the time announced by the Registry. To reacquire the right to carry out chargeable acts, the Registrar shall be required to pay to EETT an amount of money equal to the total of negative units it has carried out plus at least one additional unit.

14. The above period of five (5) calendar days may be readjusted by a relevant EETT Decision.

15. EETT shall issue and dispatch to the Registrars on a monthly basis a bill of payable fees, which shall refer to the used units and the negative units that may exist in the system at the time the bill of payable fees is created, and not to the total amount of money deposited by the Registrar.

16. In case acts are carried out with negative units, upon expiry of the period provided for in paragraph 13 of the present Article – within which the Registrar has the right to carry out chargeable acts in the Register while having zero units – the Registrar shall be required to immediately pay the

fees within twenty (20) days. In any case, if the above time limit has expired and the Registrar has not paid in full its debt obligation, EETT shall send to the Registrar a written notification setting for the full payment of the debt a time limit of thirty (30) calendar days from the date stated on the reference number of the written notification, upon expiry of which it shall proceed to the Registrar's definitive deletion by an EETT Decision.

17 The Registers that until the publication of this Regulation currently have limited access to the Register for non-compliance with the provisions of AP EETT 592/012 "Regulation on Management and Assignment (Domain Names) with suffix. Gr» (GG 593/V/2011) are deleted from the Registry Registrars EETT without conducting a hearing.

18. The Registrars shall be required to have (at least two) Domain Name Servers of their own and to ensure the proper function of these servers for the provision of services to the Registrants upon request, as well as for their network connection with the Internet Domain Name System.

19. The Registrars shall be required to have the necessary software and hardware infrastructure so as to be able to communicate with the Register using at least one of the methods made available by the Registry, in order to serve the Registrants' declarations. These methods shall be published on the Registry website.

20. The Registrar shall not be entitled to proceed to any act related to a [.gr] Domain Name without the prior consent of the [.gr] Domain Name Holder. This consent shall have to be obtained in written or electronic form and kept in the Registrar's respective file.

21. The Registrar shall have the right to act as a Registrant as well, but only with respect to [.gr] Domain Names intended for its own use. In any case, the Registrar must not abuse this right by seeking the assignment of an unjustifiably large number of [.gr] Domain Names to itself.

22. The Registrars shall not refuse without reasonable cause the provision of their services in accordance with the present Regulation.

23. The Registrars shall allow EETT and/or any persons appointed from time to time by EETT to visit the Registrars' facilities and check their compliance with their obligations. Also, the Registrars shall supply to EETT any information required related to their operation as Registrars.

24. During the provision of their services, the Registrars must comply with all their obligations under the present Decision.

25. The Registrars shall be required to use the Register only in order to comply with their obligations under the present Regulation. Furthermore, they shall be exclusively responsible for the proper registration of the Registrants' data in the Register, while any cost incurred for the correction of incorrectly registered data shall be covered by the Registrar.

26. In case a Registrar wishes to cease operating as such, it shall be required to inform in writing, at least ninety (90) working days in advance, the Registry, EETT and its Registrants, so that the latter can be promptly

transferred to another Registrar. Also, the Registrar shall be required to proceed to any action necessary for the transfer of the [.gr] Domain Names. EETT shall duly publish this fact on its website, and shall invite all concerned Holders and Registrants to choose a new Registrar. At the latest upon expiry of the above period of ninety (90) days, EETT shall deactivate the Registrar's access to the Register and shall delete the Registrar from the List of Registrars published on its website.

27. In case a Registrar comes under liquidation or receivership, or is declared bankrupt, it shall be required to immediately declare its termination of operations to EETT, submitting the relevant documents proving this fact. EETT shall duly publish this fact on its website, shall invite all concerned Holders and Registrants to choose a new Registrar, shall deactivate the Registrar's access to the Register, and shall delete the Registrar from the List of Registrars published on its website.

28. In the cases of paragraphs 26 and 27 of the present Article, upon the Registrar's deletion and deactivation, any Domain Names assigned to Registrants that have not ensured their transfer to a new Registrar shall remain valid until their expiry but no act shall be carried out in relation to them.

29. In case a Registrar of Domain Names also operates as an Internet Service Provider (ISP), the Resolvers in the access network must not be Authoritative Domain Name Servers with respect to zone files of other Domain Names, excluding any cases of Domain Names in which the Internet Service Provider (ISP) is the Holder / person entitled to them.

30. Following the issuance of a relevant EETT Decision, the Registrars may be allowed to communicate to third parties any registration data of [.gr] Domain Name Holders that are legal persons.

31. Limitedly, in the case of incorrect submission of a Registrant's data by the Registrar, their correction following the assignment of the [.gr] Domain Name shall be allowed upon submission of a 'Holder's Corporate Name / Name Change Declaration'. In case of submission of such a declaration, the Registrar shall be required to have informed the [.gr] Domain Name Holder in advance. The act shall be chargeable according to the provisions hereof regarding the declarations for the change of the Holder's corporate name / name.

Article 18
Deletion of Registrars and other administrative sanctions

In case the Registrar does not abide by the provisions hereof, EETT, after holding a hearing, may under Article 77, paragraph 3 of Law 4070/2013, impose a special reasoned decision of one or more of the following sanctions::
  a.   Registrar Deletion

In case the Registrar breaches any of its obligations under the present Decision, EETT shall be entitled to proceed with the deletion of this Registrar from the List of Registrars. In case of issuance of a Decision that orders the deletion of the Registrar, EETT shall deactivate the Registrar's access to the Register, shall delete the Registrar from the List of Registrars published on its website, shall duly publish this fact on its website, and shall invite all the Holders of [.gr] Domain Names managed by the Registrar in question to choose a new Registrar. By a relevant Decision, EETT shall be entitled not to accept Registrar's notices submitted by persons that have earlier been deleted as Registrars by an EETT Decision in accordance with the present Regulation.

b. Fine according to the provisions in force.

c. Recommendation.

CHAPTER VIII
DATA PROTECTION

Article 19
Data protection

1. The personal data of natural persons that are [.gr] Domain Name Holders shall neither be published nor disclosed to any third parties in case of the Holder's prior explicit refusal.

2. As an exception to the above, in any event EETT shall disclose the data of a [.gr] Domain Name Holder in case of a relevant Public Prosecutor's Order.

3. Following the issuance of a relevant EETT Decision, the Registrars may be allowed to communicate to third parties that submit to them a relevant request, the personal data of natural persons that are Holders of [.gr] Domain Names they manage and have not explicitly refused the disclosure thereof.

4. Without prejudice to the provisions of the legislation in force regarding the protection of personal data, the Registrars shall only collect personal data of the persons submitting [.gr] Domain Name registration declarations, or declarations for other acts related to [.gr] Domain Names, to the extent necessary for processing these declarations. The collection or processing of personal data for other purposes without the concerned person's consent shall be prohibited according to the legislation in force.

CHAPTER IX
FEES

Article 20
Fees for the assignment and the use of [.gr] Domain Names

1. The Registrants shall be required to pay fees to EETT in exchange (a) for the assignment of the [.gr] Domain Names, so as to cover the cost of their management by EETT, and (b) for their use.

2. For each act of assignment of a [.gr] Domain Name, or activation of a reserved [.gr] Domain Name, or transfer of a [.gr] Domain Name, or change of the Holder's corporate name / name, or renewal of an assigned or activated reserved [.gr] Domain Name, the Registrar shall pay to EETT the respective fees determined in Annex IV attached hereto. No fee shall be paid to EETT in case of a declaration for the above acts that is considered void. The fee charged for the renewal, transfer or change of Holder's corporate name / name of an assigned [.gr] Domain Name shall also cover the cost of the renewal, transfer or change of Holder's corporate name / name of any other form of the assigned [.gr] Domain Name reserved automatically according to paragraphs 7 and 8 of Article 3 hereof but not yet activated (following a relevant request by the Holder).

3. The Registrar shall be entitled to demand the payment of fees by the Registrants even if no fee payment is required by EETT, as e.g. in cases of registration of DNSSEC (DS Records) in the Register.

4. The Registrars, subject to the penalty of deletion from the List of Registrars published by EETT, shall be exclusively responsible for the payment to EETT of the fees related to assignments of [.gr] Domain Names, activations of reserved [.gr] Domain Names, transfers of [.gr] Domain Names, changes of Holders' corporate names / names, and/or renewals of assigned or activated reserved [.gr] Domain Names of the Registrants they serve.

5. The fees that the Registrar shall demand from a Registrant, as well as the General Terms of Transactions that shall govern all acts related to [.gr] Domain Names, shall have to be stated on the Registrar's website.

6. The fees shall have to be stated on a conspicuous and easily accessible location of the Registrar's website so as to enable the competent EETT Services to carry out price checks at will.

7. The Registrars, subject to the penalty of deletion from the List of Registrars published by EETT, shall not be entitled to charge any Registrant with fees higher than those determined in Annex IV attached hereto.

8. For a hearing to be held under the EETT Hearings Regulation following a complaint for any breach of the present Decision, the complainant shall be required to pay a fee, of €200 if it is a natural person or of €400 if it is a legal person, which shall be deposited to a bank account of EETT published on its website.

9. By issuing a relevant Decision, EETT shall be entitled to readjust the amounts of the fees determined in Annex IV attached hereto. The period between the publication of the Decision in question and its entry in force may not be less than three (3) months.

CHAPTER X
SUPERVISION

Article 21
Supervision and other provisions

1. EETT shall supervise and control the implementation of the present Decision.
2. The Registry and the Registrars shall be required to supply to EETT any relevant information considered necessary by EETT for the management of the assignment of Internet domain names or for statistical purposes.
3. The Registry shall be required to prepare and submit to EETT a Quarterly Activity Report, the content of which shall include all qualitative and quantitative data related to the management of the [.gr] domain names and shall be as determined by EETT from time to time.
4. EETT shall be entitled to proceed with the publication of any information necessary for the fulfillment of its tasks, respecting the principles of transparency, proportionality and professional secrecy.
5. EETT may carry out promotional activities to enhance the domain names of. Gr and the growth of consumer interest

CHAPTER XI
FINAL AND TRANSITORY PROVISIONS

Article 22
Transitory Provisions

1. Upon its entry in force the present Decision shall repeal EETT Decision no. 592/012: "Regulation on Management and Assignment of [.gr] Domain Names" (Gov. Gaz. Issue 593/B/14-4-2011),.
2. The present Regulation shall govern all [.gr] Domain Names assigned prior to its entry in force, regardless of the procedure followed for their assignment.
3. Applications for acts related to [.gr] Domain Names that were submitted to the Registry prior то 30-10-2011 and are still pending shall be processed based on the existing provisions on the date of the application submission.
5. Complaints that were submitted to EETT prior to the entry of the present Decision in force and are still pending shall be processed according to the provisions applicable prior to the entry of the present Decision in force.

Article 23
Entry in force

1. The present Regulation shall be published in the Government Gazette.
2. The present Regulation shall enter in force at 11:00 a.m. on the 21th of July 2013.

Article 24

Annexes

The following Annexes constitute integral parts of the present Regulation:

Annex I

Characteristics of the Server Names used for '.gr' Domain Names

1. Each '.gr' Domain Name should be served at least by two (2) Name Servers. The said servers shall return NS Records with all relevant information for all the Name Servers serving the specific '.gr' Domain Name in question.

2. The Name Servers shall return Mail Exchange (MX) records for each '.gr' Domain Name they serve. The e-mail servers associated with the said records and used by the beneficiary of the '.gr' Domain Name have been adjusted so as to accept e-mail messages sent to the corresponding Domain Name.

3. The Name Servers shall return Start of Authority (SOA) type records for each '.gr' Domain Name they serve, which shall be compatible with the following specifications :

   a. The "MNAME" field includes the name of the primary Name Server for the '.gr' Domain Name;

   b. The "RNAME' field includes a functioning e-mail address;

   c. The serial numbers and timers follow the principles of the Domain Name System so as to prevent any material differences from them.

Annex II

Criteria to be met by Registrars

1. Registrars must be either natural or legal persons of any form.

2. Registrars must have the building facilities, human resources and information systems infrastructure that shall allow them to fulfill their obligations as Registrars based on this present Regulation in an appropriate fashion.

3. Registrars are required:

    (a) to have and ensure the proper operation of their own Name Servers (at least two) in order to provide services to Registrants, if the Registrants wish so, as well as to ensure the Internet connection of the said servers with the Domain Name System;.

    (b) to be equipped with and ensure the proper operation of the hardware and software used for the maintenance of the archive including the data of the Registrants they serve;.

    (c) to have the corresponding human resources, in proportion to the number of Registrants they expect to serve, so as to ensure the smooth processing and checking of the assignment declarations and other acts on Domain Names within the deadlines provided for in the Regulation.

4. EETT is entitled to publish Ethics Regulations to be complied with by Registrars or to determine the minimum necessary infrastructure requirements, in compliance with the provisions set forth in the Greek law and the law of the EU. Furthermore, EETT may by virtue of a Decision, determine a procedure of voluntary accreditation for Registrars.

Annex III
Common Use 2nd level '.gr' Domain Names

The following 2nd level Domain Names are made available for the assignment of 3rd level Domain Names:

a.   com.gr
b.   edu.gr
c.   net.gr
d.   org.gr
e.   gov.gr.

- o A [com.gr] Domain Name is only assigned to those engaging in commercial activities;

- o An [edu.gr] Domain Name is only assigned to educational organizations;

- o A [net.gr] Domain Name is only assigned to Internet Service Providers – ISPs) and network providers;

- o An [org.gr] Domain Name is only assigned to non-profit organizations;

- o A [gov.gr] Domain Name is only assigned to governmental organizations

Annex IV

Fees for the assignment and use of Domain Names

1. For each act concerning the assignment or activation of a reserved [.gr] Domain Name, or for the transfer – change of a Holder's corporate name / name, or for the renewal of an assigned or activated reserved [.gr] Domain Name the Registrar shall pay to EETT a fee equal to twelve euro and fifty cents (12.50)

2. The maximum fees a Registrant may pay to a Registrar are determined as follows:

> (a) Euro forty four (€ 44.00) plus VAT for the assignment of a [.gr] Domain Name;
> (b) Euro forty four (€ 44.00) plus VAT for the activation of a reserved [.gr] Domain Name;
> (c) Euro forty four (€ 44.00) plus VAT for the transfer of an assigned or activated reserved [.gr] Domain Name;
> (d) Euro forty four (€ 44.00) plus VAT for the change of the corporate name / name of a Holder of an assigned or activated reserved [.gr] Domain Name;
> (e) Euro twenty nine and thirty cents (€ 29.30) plus VAT for the renewal of an assigned or activated reserved [.gr] Domain Name.

3. The above fees include the fee paid by the Registrar to EETT.

<u>**Annex V**</u>
SAMPLE [.gr] DOMAIN NAME ASSIGNMENT DECLARATION

Date / Time when the declaration is submitted to the Registrar	

To the Registrar under corporate name…………………….

Note: The asterisk fields (*) shall be necessarily forwarded to the Registry and if not completed, the declaration shall be invalid pursuant to article 7, par. 1^a of the regulation.

Tick (√) any of the following information you consider confidential and wish to remain secret

A. Requested Domain Name

Domain Name*:	

B1. Applicant's Details – Natural Person's Identity Details

Person's code:	
Full Name*:	
Police ID Card No.:	
Telephone*:	
Fax:	
E-mail*:	
Person's authorization code*:	

B2. Applicant's Details – Legal Person's Identity Details

Person's code:
